

ChemEd 2009 Radford University – Summer 2009

ChemEd Conferences began in 1973 in Waterloo, Ontario. It originally began as a group of high school teachers wanting to share ideas, classroom experiences, and laboratory experiments with other high school teachers. Over the years, it has blossomed into the sharing of ideas with teachers from kindergarten through graduate school. Chemistry educators come from all over the world to share ideas and learn new ways to invigorate their classes.

Teachers that attend this conference will be able to:

- ! identify and apply new safety procedures
- ! upgrade laboratory skills
- ! learn new activities to reach undermotivated students
- ! attend hands-on workshops so they will be able to demonstrate concepts
- ! incorporate strategies to include all learners
- ! improve classroom management skills
- ! expand curriculum

Teachers will need to fill out a form, available before the conference, to verify attendance. Teachers can request a certificate of attendance.
